

2. Identify acute and obtuse angles and compare and order angles.

a) In this quadrilateral, identify which angles are acute, right angles and obtuse angles.

acute

right angle

obtuse

3 marks

b) Order these angles from smallest angle to largest – write the numbers on the line.

Order smallest to largest

1 mark

3. Identify lines of symmetry in 2D shapes presented in different orientations.

a) Draw in all lines of symmetry on each shape. Use a pencil and ruler, if there are no lines of symmetry leave the shape blank. You can use a mirror and/or tracing paper to help.
